

Reported Crimes, San Francisco (2018)

Overview: This project analyzes 2018 San Francisco crime data to identify key patterns and guide SFPD resource allocation.

Key Findings:

- **Peak Times:** Crimes surge midday (12-8 PM) and weekends, with larceny and vehicle theft spiking in summer (July/August).
- **Top Offenses:** Larceny theft dominates citywide, while drug and prostitution offenses show volatile seasonal spikes.
- **Chronic Areas:** Mission, Tenderloin & Southern Market lead in violent crime, drugs, and theft.
- **Hot Intersections:** Market/Powell and 16th/Mission drive repeat thefts & assaults.
- **Key Districts:** Southern, Mission & Central face the highest crime loads.

Recommendations:

- **Timing:** Increase patrols late at night, midday, and especially on Fridays and Saturdays (12–8 PM). Focus on summer months, particularly July and August.
- **Crime Types:** Target larceny theft, motor vehicle theft, burglary, vandalism, drug offenses, and prostitution—especially during February, April, and August.
- **Hotspots:** Prioritize high-crime areas like Mission, Tenderloin, South Market, Financial District/South Beach, Bayview-Hunters Point, and North Beach.
- **District Focus:** Boost efforts in Central, Southern, and Northern districts for drug-related activity.
- **Patterns:** Use weekly trends and recurring crimes to optimize officer schedules and patrol strategies.

Disclaimers:

- There are different levels to crimes
- Many phases to each report/incident
- One arrest can have several charges
- There was a large amount of uncategorized data
